RC101 – Learnable Multi-room Remote

RC101 is the first remote controller that is specifically optimized for multi-room usage. The first to send independent multi-room code to control sound in Zone A, Zone B and Zone C. And that's good news, because 'multi-room' capability is supported by many of our AV Receivers. It's also possible to setup the remote for use in the main room as an easy to use, fewer-button device compared to the standard remote that comes with the system – and the stylish backlight makes it easy to use in the dark. Also, it comes with code sets pre-installed for all Marantz equipment as well as for many other brands, and for extra functionality it can directly learn new codes as well.

because music matters
